

POWER GENERATION AND DISTRIBUTION

From small **outdoor** events in remote areas to city centre **STREET PARTIES** and in some of Scotland's most **iconic** locations, we always design our power systems to include all necessary **safety** and protection devices, back-up power and contingencies. **No job is too big and no job is too small.** If you need temporary power over a large festival site or back up systems for a private event, we'll have you **powered** up efficiently and safely.

CATALYST
NO PROBLEMS
just SOLUTIONS.
